# Tomatoes and Peppers Descriptions for 2022

Tomatoes	Photo	Description
Amish		Plum, Paste, Sauce, Salsa  Dates back to the turn of the century, and is the best for sauces and canning. Its deep red fruits are large for canning types (about 8 oz.), with "real tomato" flavor. Not overly acidic.
San Marziano		Plum, Paste, Sauce, Salsa 90 days. A heftier version of any San Marzano tomato that we have trialed with a magnificent, robust flavor to boot. Large, open, indeterminate plants produce enormous, meaty fruit measuring 2 1/2 inches wide and 7 inches long. Ruby red tomatoes have green streaked shoulders and very few seeds. These giants will go a long way in sauce and salsa recipes.
Yellow Plum		Plum, Paste, Sauce, Salsa 70 days. Lycopersicon esculentum. Plant produces high yields of lemon yellow plum shaped tomatoes. Tomatoes grow in clusters. They are very sweet and have a rich tomato flavor. Excellent in salads and canning. Indeterminate. NOTE: These are not commercial seeds. I saved these seeds so some differences might occur and so no clear history of variety.

Quadro/ Quatro Red Plum

#### Plum, Paste, Sauce, Salsa

Vigorous, medium-sized, 2-4 oz, multiuse Roma with great flavor. Bred in Germany for late blight resistance, and for growing outdoors or in the greenhouse. High yields late into the season. Moderately juicy paste is good for many uses – we love it for salsa! 70 days

NOTE: These are not commercial seeds. I saved these seeds so some differences might occur and so no clear history of variety.

	Cherry
Gold Nugget	60 days. Always among the first to ripen, Gold Nugget attains an unusually rich, sweet flavor when mature. Vigorous and determinate, plants are loaded with 3/4 inch, round golden fruit from early in the season 'til frost. Bred by Dr. Jim Baggett at Oregon State University.
Siletz	Slicer medium medium bright red slicing  70-75 days. Siletz is one of the most reliable slicing tomatoes you can grow. Coming in just ahead of Oregon Spring, with a nice flush of 4-5 inch deep red fruit that weight up to 1 pound. The flavor-packed red tomatoes are nearly seedless. Expect several bursts of ripe tomatoes as the season progresses. Vigorous determinate plants are parthenocarpic. Bred by Dr. Jim Baggett of Oregon
Stupice	Slicer small  60-65 days. This cold-tolerant tomato ripens sweet, red, slightly oval, 2 inch fruit that make an excellent choice for first-of-the-summer salads, lunch boxes, and juicing. Stupice consistently gets high marks for taste throughout the summer. Pumps out fruit over the entire season. Bred in the former Czechoslovakia. Indeterminate potato leaf variety.

# Cherokee Purple

#### Slicer medium

Cherokee purple is the name of a cultivar of tomato, that develops a fruit with a dark mahogany-red color while maintaining a somewhat greenish hue near the stem when

mature for eating. Wikipedia

Scientific name: Solanum lycopersicum

'Cherokee purple'

Higher classification: Tomato

Rank: Cultivar Plant height: 9 feet Fruit Weight: 16 oz

Color: Dusky red, green shoulders

Indeterminate

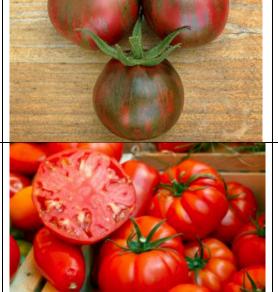

### Brandywine

#### Slicer large

red to purple, large, lobed 85 days. This winner of Territorial Seed Company's Great Northwest Tomato Taste-Off has the flavor to which all other tomatoes are compared. An indeterminate, potato-leaf variety with a sweet, rich, slightly spicy flavor. Not a heavy-yielding tomato, but the rounded fruit are large, up to 7 inches across. We have been selecting and growing seed of Brandywine for many years; our selection is now one of the earliest strains.

# Black Vernissage

#### Slicer small/Sauce

Slicer large

From Baker Creek Rare Seeds
That combination of rich flavor and being
particularly meaty, the Vernissage lends itself
well to a heavy red sauce where it needs little
herbal assistance in creating a fresh, rich
flavor. Black Vernissage Tomato (solanum
lycopersicum) originated in the Ukraine. Also
known as Vernisazh Chernyi. Indeterminate

#### **Beefsteak**

Approximately 80 days to maturity, indeterminate, large, meaty, juicy red slicer Great for sandwiches and salads

## Cherry (Solanum lycopersicum) Beautiful cherry tomato that ripens to a golden orange. The Sun Gold Cherry is possibly the sweetest cherry tomato around. Plants bear lots of Sun Gold fruit, and ripen early, continuing to produce throughout the season. Single plants can produce well over 1000 tomatoes. Hybrid. Indeterminate. 57 days. Cherry Heirloom Cherry Tomato from Germany produces huge clusters of 20-40 richly flavored fruits. Indeterminate Each packet contains 30 seeds Sow indoors 6-8 weeks before average last frost date using a Burpee seed starting kit. Transplant to the Riesentraube garden 4 weeks after the average last frost date. Harvest in 85 days Plant Height is 48". plant spread is 36". yields 1.5" fruit Plum, Paste, Sauce, Salsa 80 days. A cross between Wasatch Beauty and Pepper tomato, Gill's All Purpose was bred in 1947 by the Gill Brothers Seed Company in Portland, Oregon. Outstanding yields of 3–3 ½ inch, 4 oz. deep red fruit with rich tomato flavor. Gill's Semi determinate Cherry Cocktail-sized, 1-2 oz. red fruits borne on a compact, determinate plant. Sweetness combines with moderate acidity to create a wonderfully complex flavor. Smooth internal texture characteristic of the finer heirlooms. Very nice eating tomato. Tolerant of cooler spring Glacier temperatures and particularly well-adapted to the North. Generally the first tomato to ripen in the field. Watering evenly will reduce splitting. Determinate.

	Slicer Medium
Beaverlodge Slicer	Bred at the Beaverlodge Research Center in Alberta, Canada. Beaverlodge Slicer is one of the earliest maturing tomato varieties at 55 days. Plants are loaded with 2", smooth, red, round tomatoes that have rich and well-balanced flavors. This variety is perfect for growing in patio containers. Excellent for short season areas and coastal climates. Determinate
Cordova	Plum, Paste, Sauce, Salsa  85 days. If you are seeking a very dependable processing tomato, Cordova should be in your garden. Compact, determinate plants produce hefty, blocky red fruit that measures 2 inches wide and 3 inches long with dense meat and lots of flavor. Substantial harvests of sweet and tangy fruit for drying or making sauce and salsa.
Woodle	Solanum lycopersicum The Woodle Orange tomato is an Iowa heirloom beefsteak variety that grows 1.2-1.8 m (4-6') tall. Staking and tying will be required. It is known for its brilliant tangerine orange color and sweet taste. Produces large, round shaped fruit with a smooth, blemish free, polished skin. Its' rich complex taste can be enjoyed fresh or mixed in with salads. A super, fancy-looking variety that makes a good market tomato. Indeterminate.
Deep Red	NOTE: These are not commercial seeds. I saved these seeds so some differences might occur and so no clear history of variety.

## Beaverlodge Plum

#### Plum, Paste, Sauce, Salsa

about these tomatoes at our trials. Not only were they two of the earliest maturing varieties, but the plants were so loaded with tomatoes that there seemed to be more fruit than leaves! What's more, these extremely compact, determinate plants tend to creep rather than grow tall and would be perfect in a hanging basket or patio container. Did we mention how rich and balanced the flavor is, especially for an early type? Truly a great combination of earliness, size, productivity, and quality. Bred at the Beaverlodge Research Center in Alberta, Canada. 2 ½ inch long, plum shaped fruit.

NOTE: The Seed packet only says "Roma" and doesn't identify the specific variety.

Plum, Paste, Sauce, Salsa

Heirloom variety produces high yields of pear-shaped red fruits with thick walls, meaty textures and few seeds. Roma tomatoes, sometimes called plum tomatoes or Italian tomatoes, are a favorite for cooking into sauce and canning. Because they contain less moisture than many other varieties, Roma tomatoes are also a top choice for chopping into salsas and dehydrating for sun-dried tomatoes. A determinate, Roma plants produce tomatoes that ripen at about the same time. For the best flavor, allow your Roma tomatoes to ripen on the vine.

# Roma

#### Determinate vs. Indeterminate Tomatoes

There is nothing quite like a home-grown juicy, sweet ripe tomato. Tomatoes are classified by their growth habit and fall into the categories of determinate and indeterminate tomato varieties. Once you know the characteristics, it's easy to tell which tomatoes are determinate and which are indeterminate. Duration and form of growth are the main ways to tell the difference between determinate and indeterminate tomatoes. Which type you choose will depend upon the use, available space and the length of your growing season.

Peppers	Photo	Description
Serrano		Medium hot  The serrano pepper is a type of chili pepper that originated in the mountainous regions of the Mexican states of Puebla and Hidalgo. The name of the pepper is a reference to the mountains of these regions. 85 days
Jalapeno		Medium hot  66 days. Most familiar in their green stage, jalapeños are hottest and fully ripe when they turn red. The stocky 2 foot tall plants will not fall over or break branches even with a heavy load of fruit. The short, 2-3 inch peppers are thickwalled and juicy. Use fresh, pickled, or in sauces. Early Jalapeño will set fruit under cooler conditions than other jalapeño varieties.
Marconi Rosso		Sweet, non-bell, Italian  Marconi Rosso is a large sweet pepper that is 8" long and 3" wide. They are green ripening to deep red and are delicious at all stages. Excellent raw, grilled and stuffed. They are very uniform and the plants are prolific. 80 days.
Shishito		Mild, Sweet, Spicy Similar to Pimiento de Padron  60 days. Shishito is a Japanese sweet pepper that produces handfuls of finger-long fruits. Usually used when green (though also fine to eat when red), the peppers are thin-walled, making them ideal for tempura and stir fries. On this side of the Pacific, it's wildly popular as an appetizer—tossed with oil, then chargrilled or pan-seared to a blackened, blistered state and salted. Plants are compact and perfect for containers.

	Mild, Sweet
Banana	75 days Named for its banana-like shape, this variety bears sweet, mild banana peppers that mature from yellow, to orange, and then to crimson red. Plants fruit prolifically, easily producing up to 25 to 30 pods per plant. Banana peppers are great for frying and pickling, and are an excellent choice for making pepper rings for sandwiches. Great for containers.
Paprika	Hot 85 days. Capsicum annuum. Open Pollinated. Plant produces good yields of 4" long by 1" wide hot peppers. Peppers are mildly hot and turn from green to dark red when mature. Plant has green stems, green leaves, and white flowers. Excellent when dried, crushed, and ground into Paprika powder.
Padron	Mild with occasional hot one Padrón peppers or Herbón peppers are a variety of peppers from the municipality of Padrón in the province of A Coruña, Galicia, northwestern Spain. European Union law has protected the name Pimiento de Herbón under the protected designation of origin since 2009. Small Thin-Skinned Peppers for Tapas Small, slightly blocky and wrinkled peppers are mild, for the most part. Occasionally, you come across a hot one but that is part of the fun! Pick early and often if you are afraid of the heat. The traditional preparation for these is pan fried in a olive oil until slightly charred and served sprinkled with coarse sea salt. Then, eat everything but the stem!
